Enhance the look of your building, while saving energy at the same time with the...

- Works exceptionally well when undersized replacement units (or no unit at all) are installed into existing sleeves which cause large gaps.
- Manufactured specifically for through-the-wall type air conditioner units.
- Installs in seconds - no holes in walls - simply slip over sleeve and you're done!
- Heavy elastic shock cord holds cover tightly to sleeve.
- Custom sized for most commonly used sleeves like: Westinghouse, GE-Hotpoint, Whirlpool, Frigidaire, Kenmore, Fedders and Coldpoint.
- Protects costly A/C units from dirt, dust, weather and insects.
- No more drywall or trim damage from tenants duct taping unsightly materials to your building.
- Simply slip cover off when the season is over and store until needed next year.
- Property owners control the installation and removal of covers for a more consistent/attractive appearance.
- Standard sizes in stock and ready for shipment!
- Made in the U.S.A.!
